CLUB CALENDAR

(Calendar of Events is also available on the Club's Website)

Each Monday	Monday Morning Breakfast @ 8:30 am BYOBC (Bring Your Own Breakfast & Coffee)
Monday, December 7th	Executive Meeting @ 7 pm
Friday, December 25th	Tentative Club Rental - Plumb's (Pending COVID restrictions)

Our condolences to Carol Perkes & Mike Fournier. Carol's father, Jim, had emergency surgery on a ruptured aneurysm on October 8th and has been in hospital since. They thought he had turned the corner, but unfortunately, his heart gave out early Thursday morning. In accordance with Jim's wishes a celebration of his life will be held when Covid restrictions are lifted. (For more information see the Windsor Star)

With Sympathy

Congratulations to Paul Cairol. After receiving numerous applications, Paul has been selected, by Ontario Sailing, as a Director. He will be joined by other nominees from Reef Boat Club, Maple Leaf Fund, RCYC and Oakville Yacht Squadron. You make CIYC proud Paul and again put us on the map.

LOOKING FOR AN OPTI SAILBOAT

My grandson who is 10 now has been sailing for the last 3 years. His parents want to buy him an Opti sail boat.. Do you know of anyone that has one and may want to sell it? He actually is able to sail it by himself and belongs to the Junior Belleville Yacht Club.

Contact Rachel at rcpark@mnsi.net or 519-738-6184 so she can pass the information on to this proud grandparent.

At Windsor Shrink Wrapping Inc., we take pride in the work we do. With over 18 years of experience, our services are endless. Our elite trained shrink wrap technicians provide excellent craftsmanship that comes from years of practice. We wrap residential patio furniture and accessories, commercial machinery, industrial equipment, freight, boats, enclosures, and rail cars.

RECYCLING SHRINK WRAP

I worked for both BFI and GFL for many years.

When times were good, we used to pick up the used wrap from many different places (marinas and machine shops as well as farms) for free, if they gathered it in one area. It was worth something at one time

Unfortunately, things are not as good they used to be with the buyers of this type of material (Chinese) and the recycle companies no longer pick it up for free.

When it is past it's prime (you can usually get 2-3 years use if you are careful when removing it in spring), I suggest that it be rolled into a ball and shot with a heat gun so it can be stomped on and compressed to almost the size of a small coffee table. That way it can be put into a commercial recycle bin .

*Hope this helps
Dave Laforet*
